

*"Local Service-Regional Supply Strength"  
"Customized Packaging-Customized Distribution"*

June 1, 2007  
News Release

Dry Ice Corp. and Air Liquide are pleased to announce that in the ongoing development of their long term partnership they have created a new innovative manufacturing/distribution model at the Air Liquide dry ice manufacturing plant located in Gibbstown, New Jersey.

Effective June 1, 2007 the Dry Ice Corp. Philadelphia Distribution Branch formerly located in Philadelphia has relocated to Gibbstown, New Jersey.

This new model will provide current and future dry ice customers throughout the Northeastern United States with the freshest dry ice products available along with the most cost effective distribution logistics.

The Air Liquide plant in Gibbstown, New Jersey is the largest dry ice manufacturing plant located in the Northeastern U.S. and primary manufacturing plant for Dry Ice Corp. products. Air Liquide is one of the world's largest multi-national industrial gas suppliers with manufacturing operations throughout the world.

Dry Ice Corp. is the largest "regional" dry ice supplier in the Northeastern United States providing customized products and customized delivery services from six "local" distribution branches from Maine to Virginia.

Dry Ice Corp. has also moved the Dry Ice Corp. Northeast Logistics Operations Center to Gibbstown, NJ. The combination of the move of the Philadelphia Distribution Branch and the Logistics Operation Center to Gibbstown will allow all customer orders to be processed in the most efficient manner possible and also provide improvements related to; product freshness, route efficiency and timely customer deliveries.

These additional benefits; improved product freshness, efficient customer order processing and route efficiency will be very important to our customers as the requirement for energy and fuel conservation continues to be critical to our environmental and customer service programs.
