

Dry Ice Uses

Use Dry Ice to create “Witches Brew” and “Fog” **FOLLOW ALL SAFETY INSTRUCTIONS WHEN HANDLING AND USING DRY ICE!**

FOG EFFECT

Place pieces of dry ice, 5 to 10 pounds into the bottom of your container (not glass, dry ice is extremely cold and may cause breakage, metal preferred) holding about 4 to 8 gallons of HOT WATER. Make sure the container is only 3/4 full because the water will bubble and splash. The dry ice and hot water will cause a fog effect. **DO NOT INGEST DRY ICE. DO NOT ALLOW ANYONE; BABIES, CHILDREN, ADULTS OR PETS TO LIE DOWN IN THE FOG, CO₂ GAS DOES NOT SUPPORT LIFE. FOLLOW ALL SAFETY INSTRUCTIONS!**

WITCHES BREW!

Two Bowls Required – One Large Bowl & One Small Bowl

Add dry ice to Larger Bowl (metal, not glass) and add hot water. Dry ice will settle to bottom, stir the bottom of container with hot water to make sure all dry ice is used before adding more dry ice. Put punch into Smaller Bowl and put inside of Larger Bowl that has dry ice. Do not put dry ice directly into any products that will be consumed! **DO NOT INGEST DRY ICE.**

APPLICATION	AMOUNT	DURATION
